

# INDUSTRIAL SCAFFOLDING

Safe Work. Solid Results. Every Time.

The role of scaffolding contractors on worksites is increasingly critical to the success of the project. Whether work calls for ground supported, structure supported or suspended scaffolds, the key to success is consistently safe, productive work. That type of performance is achieved only by professionals who are trained, tested, and qualified to complete scaffolding assignments safely and productively.

## EXPERTS IN THE FIELD

The Central South Carpenters Regional Council invests time and resources to make sure our scaffolding professionals are trained to produce superior results every time.

Our priority is to place only the best trained, safest, most productive scaffolders in the industry onto the job site. Our well-trained, safety-minded scaffolders work well in the refinery, power generation, renewable energy, steel, petrochemical, civil infrastructure, industrial and commercial construction industries.

## PROVEN ABILITY VIA QUALIFICATION TESTING

Because of our training, Central South Scaffolders are experts who put a high value on working safely and productively. Our training, centers around teamwork, communications, technical proficiency and safety.

## WE TRAIN, TEST, MONITOR, & TRAIN AGAIN

Scaffolders must complete rigorous training and then are tested to earn scaffold qualifications in:

- 32, 40, and 60-hour Scaffold
- 16-hour Welded Frame & Mobile Tower
- 16-hour Tube & Clamp Scaffold
- 20-hour Systems Scaffold
- 8-hour Scaffold User
- 40-hour Industrial Scaffold
- Rough Terrain Forklift
- Aerial Lift

Our new Rigging and Signaling Certification program meets new rigger and signaler requirements in 29 CFR 1926 Section CC – Cranes & Derricks.

## OUR SKILLS GO BEYOND CARPENTRY

- **Experience.** We know how to provide safe access and egress, build engineered structures that are safe, create temporary facilities for work locations, and provide protection for workers.
- **Expertise.** We solve problems quickly by troubleshooting the issue and implementing a solution.
- **Flexibility.** Disciplined crews are available to work non-traditional hours to keep projects on time.
- **Professionalism.** We understand the importance of a good attitude and professional work ethic, and how to properly represent the contractor and project owner on the job site. Our goal is to partner with project owners to solve problems and complete tasks to their satisfaction, and address challenges that arise during a project to keep productivity humming.

## TRAINED FOR PRODUCTIVITY

Intensive training sets us apart. Classroom and hands-on instruction perfects technical proficiency, as well as soft skills such as understanding operations worksheets, and daily work schedules. We also offer customized training and onsite training upon request.

### Just a portion of our training includes:

- Scaffold Erection
- Ground Supported
- Scaffolding
- Welded Frame and
- Mobile Tower
- Tube and Clamp
- Formwork and
- Shoring
- Suspended Access/ Swing Stage
- Aerial Work Platforms
- Mast Climbing Work Platforms
- Job Analysis/ Site Inspection
- Scaffold Design
- Scaffold Prints
- Material Estimation
- Aerial Lifts
- Blueprint Reading
- Confined Space

## SAFETY STANDARDS ARE CLEAR

Safety is our top priority. Central South Scaffolders are trained in the latest safety practices in the industry. We partner with OSHA to ensure our curriculum includes their scaffold regulations. Every Central South Scaffolding professional masters safety training skills before being cleared to work. **Safety Training includes:**

- OSHA 10/30
- Ergonomics
- Fall Protection
- Powered Industrial Truck Operator
- Confined Space
- Print Reading
- First Aid/CPR/AED
- Mobile Elevated Work Platform

## FOREMAN AND SUPERINTENDENT LEADERSHIP

We train the best candidates for foremen and superintendent positions – leaders, who motivate workers, communicate effectively, and solve problems.

Superior Training. Professional Craftsmen.  
Productive Workforce.

We will provide that for you.
