*These lush and painterly digital backgrounds use a classic, sophisticated Christmas color palette, with greens, reds, and golds carefully sampled from real photos! The brush strokes are expressive, the touches of gold elegant and eye-catching, and all combined they create an effect that is very modern and trendy.*

*The unique holiday illustration collection features wonderful Christmas greenery such as cedar, spruce, pine, fir, juniper, mistletoe, holly, boxwood, and more. There are very subtle shimmery green accents which make the illustrations stand out and give them depth.*

*Touches of gold accents provide the final touch!*

*Textile inspired Earthy Digital Backgrounds: I was super inspired by the lavish and fascinating textile motifs in the latest Guo Pei Spring 2020 Couture collection, and so I created some Photoshop brushes & color palettes inspired by the fabric, fiber, and textile motifs! Using these tools, I had some fun and created these digital backgrounds / clip art that you can use in any program.*

*The Tropical Nights design collection is inspired by this gown worn by Irina Shayk at this year's Cannes Film Festival by Atelier Versace. The various textures of emerald green were completely mesmerizing, and I wanted to replicate some of the glamour of the Cannes red carpet with this striped pattern collection and set of tropical illustrations.*
