1. INTRODUCTION TO THE BIOSTEM PROTOCOL:

For the past couple years, the team at MyRegenNow has sought to provide America's best regenerative therapies.

Helping therapy seekers around the country locate the best providers, highest quality biologics, and with the industry's lowest price points has been our mode operation.

Our network has served up hundreds of therapies combined over this time.

Staying abreast of the most cutting edge research, techniques, and practices within the regenerative and alternative spaces has been critical to offering the very best in support best information.

Research data and medical studies within the stem cell world are coming out at warp speed. AI (artificial intelligence) has played a significant role in many medical based advancements.

One such development we've been following for over a year now (since early 2024), has been in the area of plant based bioactivity.

More specifically, in how natural plant based molecules can synergistically impact the human body's ability to not only release more stem cells, but to also speed up the process of delivery of these cells to specifically targeted areas (within the body).

We've been able to associate with two companies in coordinating the most cutting edge all-natural therapy protocol to date. We call it the "The BioStem Protocol".

Simply, "The BioStem Protocol" utilizes the combination of two highly targeted plant based supplementation products, with decades of research behind them.

2. WHY THE BIOSTEM PROTOCOL?

One might ask, why would this be of such importance?

The answer comes with SIX reasons.

#1. The cost of high-end therapies can be out of reach for many.

Despite our service providing quite literally the lowest price points in the industry, these therapies still cost in the multiples of thousands of dollars.

The BioStem Protocol cost roughly \$300 per month.

This amount is a far cry from the thousands to tens of thousands of dollars so many have invested in other therapies.

#2. The BioStem protocol administration is quick and easy too. As it is strictly done through oral ingestion (of the plant based supplementation). So no injections or needles in an IV.

#3. Our medical team saw a two-fold benefit of The BioStem Protocol.

They saw this protocol as the ultimate modality for the purpose of preparing a patient in advance of a higher-end stem cell therapy.

Secondly, our medical team also saw the protocol as a highly useful feature for the purpose of pre-screening patients.

Pre-screening in order to determine whether or not the patient in fact actually needs or requires a high-end therapy to address their symptoms.

In example, if the protocol's products would do the trick in relieving symptoms, then no expensive therapy would be required in the short-term (or possibly long-term).

The savings here for the average person would be significant.

As many people are not in a financial position to access high-end therapies.

So avoiding a potential high-end therapy cost through utilizing this protocol, can **open the door to more people having the opportunity to receive regenerative benefits.**

Conversely, if after 60-to-90-days the protocol's products brought minimal tangible health benefit, our team believes that it may possibly stand to reason that a more targeted high-end therapy would be needed to further address the wellness issues.

#4. In instances where high-end therapies have already been administered, The BioStem Protocol can be used to accelerate additional signaling and release of the body's own stem cells.

This compounding effect of releasing **more stem cell volume, on top of the high-end therapy's (infusion or injection) can serve to potentially enhance the intended therapeutic objective.**

#5. The BioStem Protocol offers a powerful maintenance option, whether for a previous high-end therapy or a follow-up to BioStem Protocol.

As such, a patient isn't required to have to wait up to 4-to-6 months before they can update a therapy.

Thus, patients can implement the protocol at any time.

#6. There are no dangerous side effects or rejections typically associated with The BioStem Protocol.

As the products are essentially food sources, they are deemed highly safe.

Though, as with all therapies, detox symptoms can occur such as mild headaches or diarrhea, and usually only for a couple days.

3. THE BIOSTEM PROTOCOL:

As mentioned above, "The BioStem Protocol" utilizes the combination of two highly targeted plant based supplementation products.

One specifically for stem cell release and the other for peptide support (for accelerating cell signaling).

Both stem cells and peptides have specific roles that contribute to health, healing, and cellular function.

They are essential to the body's processes of regeneration and repair.

Let's take a quick look at the importance of BOTH of these components in the protocol snapshots, below.

#1. THE STEM CELL PRODUCT SNAPSHOT:

The stem cell product is a groundbreaking approach that harnesses the power of stem cells to support the body's innate repair system.

Designed to enhance stem cell function, improve microcirculation, and fine-tune cellular signaling, **the BioStem protocol is a game-changer.**

It's designed to boost the release of stem cells from the bone marrow into the bloodstream.

This increase in circulating stem cells is crucial for effective tissue repair and maintenance.

The unique blend of natural ingredients has been clinically tested to significantly increase the number of stem cells.

#2. THE PEPTIDES PRODUCT SNAPSHOT:

The peptide portion of the protocol allows for you to choose the type of peptide product you'd most like to use.

You'll in fact receive a DOUBLE benefit (see the various supportive wellness based peptide options in main website accessible below).

One benefit of the peptide product is in their supporting and accelerating the overall stem cell process.

The other benefit is in the specific secondary wellness feature you'll be able to select through first ever precision peptides.

As we're introducing you to the first ever Bioactive Precision Peptides™.

A powerful accentuator of the entire stem cell and regenerative process.

We source the highest quality peptides and meticulously preserve their physiological activity and bioavailability.

Derived from Nature, Bioactive Precision Peptides™ are high in bioavailability from naturally occurring (plant based) sources.

Plus, Bioactive Precision Peptides™ are convenient for on-the-go folks.

In fact, BOTH (stem cell and peptide) products are designed for life on the go. Just mix (or take) with water—anytime, anywhere.

Decoded by AI, the product utilizes cutting-edge technologies for peptide discovery that encourages cell signalling.

This signalling further optimizes the body's ability to perform.

Here again, if you're not familiar with peptides, let's take a quick moment to review.

Peptides compose proteins.

They also represent signaling molecules within the body.

Peptides tell cells to perform tasks like repairing tissue and reducing inflammation.

They also support the immune system and help produce collagen.

Some peptides trigger growth factors.

Growth factors assist in healing wounds and promoting muscle growth.

Peptides support cellular repair which makes them helpful in healing damaged tissues.

Some peptides reduce inflammation, which of course speeds up recovery and improves tissue health.

Peptides can also work with stem cells (and exosomes) in increasing collagen production.

Collagen enhances skin and ligament elasticity.

Peptides additionally work with stem cells in supporting joint health and while also strengthening connective tissues.

4. POWER FROM COMBINING THE TWO:

Combining peptides with stem cell therapy is an emerging area of regenerative medicine.

One that aims to enhance stem cell function and improve tissue regeneration.

Peptides create a supportive environment for stem cells and promote their survival, proliferation, and differentiation.

Creating a supportive environment, peptides can be used to create scaffolds or hydrogels that mimic the natural extracellular matrix (ECM) of tissues.

This is significant in providing a suitable environment for stem cells to adhere, proliferate, and differentiate.

Peptides can encourage the newly released stem cells to move toward injured areas and start the healing process.

Growth hormone-releasing peptides and other signaling variants are a couple of examples.

Some peptides can stimulate MSCs (Mesenchymal Stem Cells) to differentiate into specific cell types needed for tissue repair, skin, muscle, or neuron cells.

Peptides can promote the release of growth factors, which are crucial for cell growth and tissue repair.

These growth factors and cytokines direct MSCs to the injury site, accelerating the healing process.

Repeat, it speeds up the healing process!

Inflammation can also hinder tissue repair and healing, so peptides with anti-inflammatory properties can support stem cell activity.

Anti-inflammatory peptides can reduce inflammation and speed up healing as well, thus allowing MSCs to focus on tissue repair.

Certain peptides can enhance stem cell survival and proliferation by reducing cellular stress and protecting against damage, thereby increasing the effectiveness and potency of stem cells.

The BioStem approach can be applied to a wide range of medical and cosmetic applications, including sports injuries, orthopedic conditions, and skin regeneration.

This combination also holds great promise for the development of novel regenerative therapies for various other diseases and injuries.

5. PURCHASING THE PROTOCOL PRODUCTS:

Purchase the specific stem cell products designated for "The BioStem Protocol".

There are two separate purchases you'll need to make for the complete set of products needed in maximizing The BioStem Protocol.

We've provided you direct link access for each one, see below.

To access the specific STEM CELL product designated for "The BioStem Protocol":

[Go there now by clicking here!](#)

To access the specific PEPTIDE product designated for “The BioStem Protocol”.

[Go there now by clicking here!](#)

As previously noted above, you'll in fact receive a DOUBLE benefit in peptide selection in being able to select the specific secondary wellness feature.

6. PROTOCOL PRODUCT SCIENCE:

Product SCIENCE and EDUCATION offers an in-depth look at how these two products tap into the body's natural repair system to support health and longevity.

Access the STEM CELL product science by **[clicking here now!](#)**

Access the PEPTIDE product science by **[clicking here now!](#)**

7. PROTOCOL PRODUCT INGREDIENTS:

Access the STEM CELL product ingredients by **[clicking here now!](#)**

Access the PEPTIDE product ingredients by **[clicking here now!](#)**

8. PROTOCOL PRODUCT EDUCATION:

Access the STEM CELL product educational elements by **[clicking here now!](#)**

Access the PEPTIDE product educational elements by **[clicking here now!](#)**

9. PRIMARY VIDEO OVERVIEW ON PRODUCTS:

YouTube videos give quick overview of the protocol products:

10. ACCESSING SCIENTIFIC WHITE PAPERS:

Here, we dive deeper into the science of BOTH products, your body's natural

repair system, and the regenerative potential that lies within you.

Our WHITE PAPER articles are designed to educate, inform, and inspire.

Our goal is to guide you in exploring more about your health and in providing you scientific citations of the power of COMBINING stem cells and peptides.

Backed by research and clinical trials, **each medically documented white paper offers valuable insights** into how increasing the number of circulating stem cells can support your body's healing and vitality, as well as how peptides offer a powerful and unique supporting role.

11. PROTOCOL PRODUCT FAQ:

Access the STEM CELL product FAQ section by [clicking here now!](#)

Access the PEPTIDE product FAQ section by [clicking here now!](#)

12. ACCESS MYREGENNOW WEBSITE:

Access our website to learn more about what we do in our regenerative and alternative based consultancy for therapy seekers.

[Go there now by clicking here!](#)

13. REGENERATIVE REVENUE PARTNERSHIPS:

You may optionally choose to generate additional referral based revenue by joining the respective programs.

MyRegenNow offers an independent in-house referral program where-by Ambassadors of their program can earn from referring regenerative seeking patients for a 100% free consultation.

If the referral receives a stem cell related therapy from one of MyRegenNow's medical providers, from within their network, Ambassadors can earn \$300, \$500, and \$1,000 referral fees (based on the scope of the therapy).

See the MyRegenNow compensation program .PDF [by clicking here!](#)

Join MyRegenNow's STEM CELL THERAPY PARTNERSHIP by [clicking here now!](#)
(Note: Then click the join button in the top menu!)

STEMREGEN offers an exclusive SINGLE-TIER affiliate program that is very difficult to be accepted into.

In the application process, if you tell them, "I am an affiliate of Coach Pete Meadows and MyRegenNow", you'll have a much better chance of being approved.

STEMREGEN is a single tier affiliate model paying 20% per customer purchase.

See the STEMREGEN affiliate compensation overview [by clicking here!](#)

Join the private STEMREGEN PRODUCT PARTNERSHIP by [clicking here now!](#)

MAKEWELLNESS offers a MULTI-TIERED affiliate program that allows immediate acceptance to its enrollees.

14. SPECIAL SUPPORT FEATURE:

Get individual help from our team at MyRegenNow. You can reach out directly to our team via text at 762-233-5780.

Just give us a bit of time to get back to you, especially if it's after regular hours. Regular hours would typically be from 9am-to-3pm EST, Monday thru Saturday.

Some exceptions for potential delays might include holidays and always take Sundays off.

You can also contact MyRegenNow founder, Pete Meadows, as he will personally respond back. Email him at petemeadowsbiz@gmail.com.

15. ABOUT THE AUTHOR:

Coach Pete Meadows' career spans every level of the game from high school and college coach to Major League Baseball East Coast Scouting Supervisor with the Cincinnati Reds.

He also served two stints as a scout for the Milwaukee Brewers.

His head coaching career includes four high school teams while serving at three collegiate programs as an assistant.

He won several state high school baseball championships while also earning State Coach of the Year honors twice in Georgia.

He was also recognized by the [Georgia House of Representatives for an outstanding career.](#)

See more on Coach Pete Meadows [by clicking here!](#)

A couple of years ago, Coach Pete had a great therapy result for an issue of vertigo.

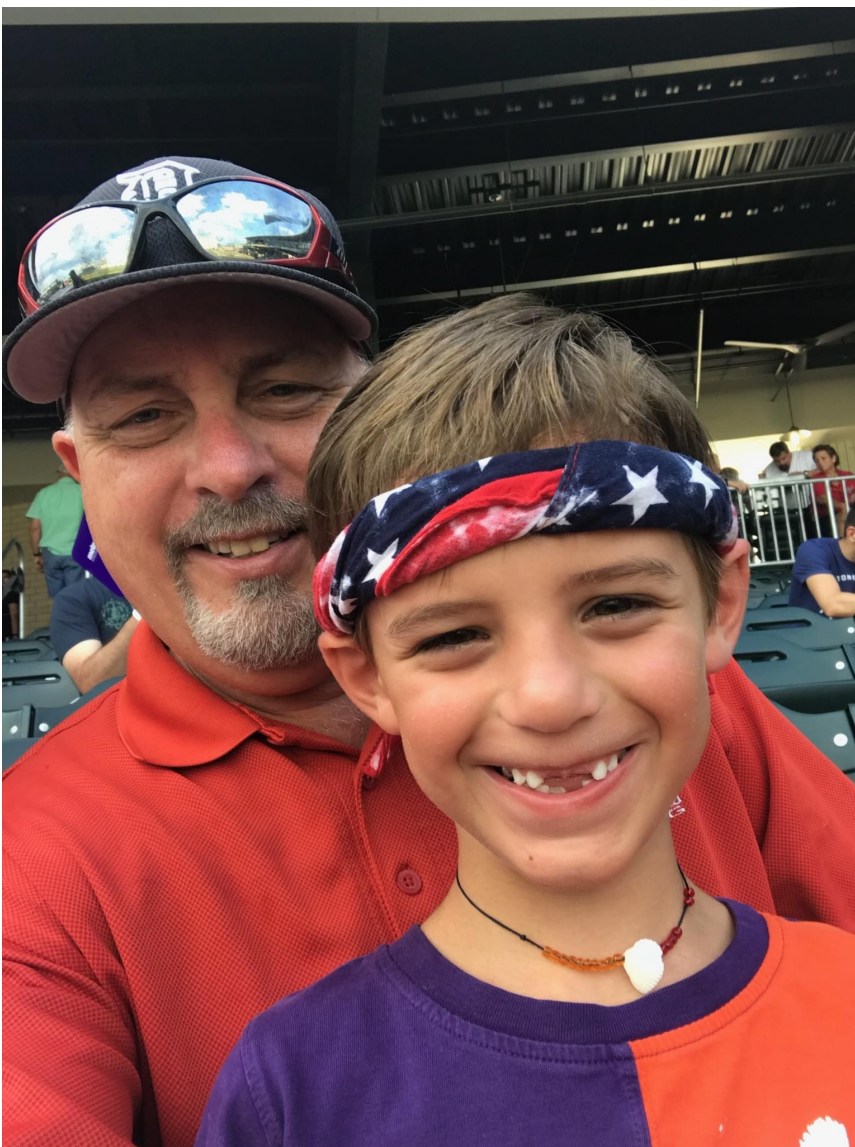

He began sharing his excitement with our family, friends, and those near and dear to him.

But he soon realized not all therapies, prices, and providers were alike. He didn't like what he was seeing in the marketplace.

As people were receiving faulty therapies and were needlessly being price gouged.

He set out to create MyRegenNow to help protect people receive the best regenerative therapies possible.

It all began with a simple mission.

Coach with youngest child, Reagan.

Helping protect family and friends from getting tangled in adverse scenarios.

Since then, he's been dedicated to helping folks just like you avoid poor products, shady providers, and outrageous price-gouging.

Today, through the trust of many, MyRegnNow has grown to help guide hundreds of people to safe therapy experiences, as well as unprecedented lower pricing.

And just like with his personal family & friends, he provides his consulting service for 100% free. **And he actually talks with you about your condition!**

Now, along with his team, he's excited to offer the world **The BioStem Protocol.**

As he believes the BioStem Protocol contains the greatest advancements in regenerative and alternative health to date. ***A stem cell therapy for all!***

16. SPECIAL OFFER:

MyRegenNow is offering a special \$1,000 discount on any future medical stem cell therapy potentially needed by any one-time (or more) BioStem Protocol implementation (using both products).
