

CORAL RESTORATION EXPERIENCE

A meaningful adventure for your guests

We offer a unique activity that can be easily added to your existing dive trips, without changing your operations.

At Livingseas, diving becomes more than exploration. Your guests don't just observe the reef, they actively participate in restoring it.

WHAT YOUR GUESTS WILL EXPERIENCE

- Hands-on coral restoration
- Learning about reef ecosystems
- Creating a real positive impact

WHY YOUR GUESTS WILL LOVE IT

- Interactive and memorable activity
- Strong emotional connection to the ocean
- A meaningful and shareable experience

WHY YOU WILL LOVE IT

- Your guests leave with stronger connection to their dive
- Your guides enjoy a more engaging and purposeful activity
- Adds value to your existing dive trips without extra complexity

WHY THE OCEAN LOVES IT

- Accelerates coral growth and reef recovery
- Supports long-term ecosystem resilience
- Increases marine biodiversity
- Restores habitats for fish and marine life

A TRUE 3 WIN EXPERIENCE

FOR YOUR GUESTS:
meaningful, hands-on
and memorable

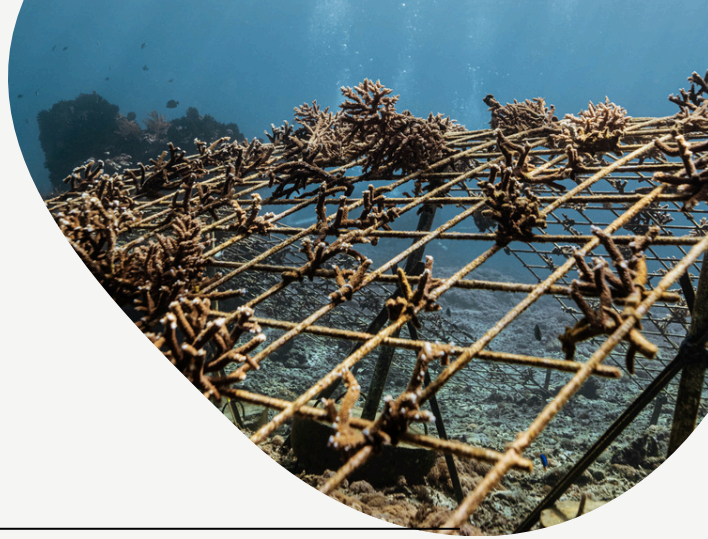

FOR YOUR BUSINESS:
added value without
complexity

FOR THE OCEAN:
real and measurable
restoration impact

SIMPLE AND FLEXIBLE COLLABORATION

This partnership is designed to integrate seamlessly into your existing operations, without adding complexity.

YOUR ROLE

- ✓ Manage your guests as usual
- ✓ In-water supervision
- ✓ Organize and operate your dive or snorkeling trips
- ✓ Include this experience in your marketing to guests

OUR ROLE

- ✓ Coral restoration setup
- ✓ Educational briefing
- ✓ Guest experience related to restoration
- ✓ Follow-up (photos and updates)

EXPERIENCE DETAILS

1 or 2 dives

- Full name
- Email address for updates
- Bamboo tag design

Pricing

- 550,000 IDR per guest
- Includes one personalised Reefstar per guest
- Each reefstar is tagged with the bamboo tag design

PROVEN IMPACT

Since 2019, Livingseas has built the largest coral restoration project in Bali, delivering measurable and visible results.

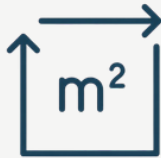

KEY MILESTONES

2019	Launch of the Livingseas coral restoration project in Padang Bai
2020	First large-scale deployment of reef structures
2021-2022	Rapid expansion of coral planting and site development
2023	Recognition as the largest coral restoration site in Bali
2024-TODAY	Continuous growth with thousands of square meters restored per year

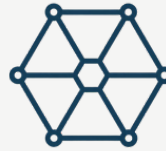

KEY FIGURES

450,000+ corals planted

Over 9,000 sqm of reef restored

Over 9,000 reef structures deployed

5 hectare reef long-term goal

PROVEN RESULTS

Coral growth rates up to 15x faster.

Fish populations increased to 10x.

Strong increase in algae and invertebrates

Return of key marine species including turtles, barracudas, and reef predators

A MODEL THAT WORKS

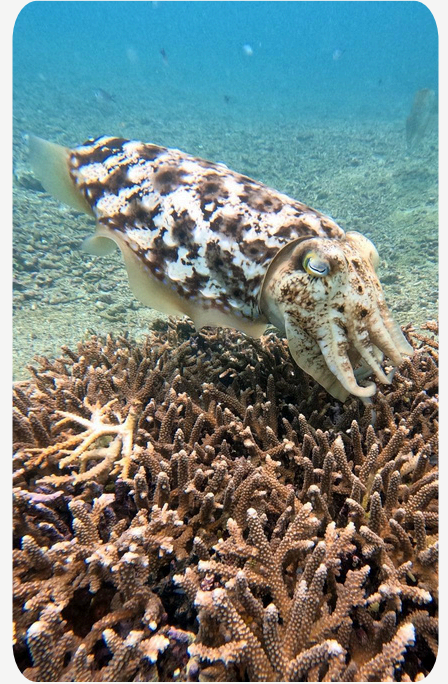

By combining marine science, tourism, and local engagement, demonstrates that reef restoration can be:

SCALABLE

SUSTAINABLE

DIRECTLY IMPACTFUL

THIS IS WHAT YOU CAN EXPERIENCE
