

The Spiritual Laws of the Universe Guide

*A Guide to understanding the laws of our
Universe, becoming a powerful co-creator with
the Universe and living a life of harmony*

STAR FAMILY WISDOM

The Laws of the Universe

The Spiritual Laws of the Universe

In this E-Book you'll learn about the mechanics of existence and how to operate by the laws of our Universe.

Our Universe was programmed with very specific laws that many of the great masters and teachers (like Pharoah Akhenaten, Buddha and Jesus) have attempted to teach the human race over the last 5,000 years. When we follow these laws and understand the science of the mind, we can begin to become powerful co-creators with the Universe.

The Law of Infinite Possibilities

The Law of One

The Law of Karma

The Law of Grace and Forgiveness

The Law of Non-Resistance

The Law of Desire and Attraction

The Law of Detachment

The Law of Giving and Generosity

The Law of Gratitude

The Law of Divine Purpose

The Law of Divine Protection

The Law of Vibration

The Law of Divine Timing

The Law of Divine Love

The Laws of the Universe

From a Spiritual standpoint, we have come to understand that the Universe is actually programmed for our highest good. The Infinite Spirit, Great Spirit, Mother Spirit, God, Source, whatever you prefer to call it, has created an algorithm that is designed to support us.

Fundamental Tenets of How the Universe is Designed and How it Works For Us:

- It favors evolution and progress; continual growth and learning
- It is designed to learn, create and bring information back to the Source
- The energy of Source flows through everything; every Soul is a spark of energy from that Source; every Soul has a piece of "God" in it
- Source is the "great creator", having given life and expression to energy; LOVE is its original expression and intention
- But every being or Soul within this Universe also has the ability to create; we are all "miniature Gods" (that's an easy way to think of it!)
- The Universe is participatory; as we act and react, the Universe acts and reacts; it's a beautiful dance of constant creation
- Duality is a program that exists in this Universe; Balance, harmony and order are its preferred expression
- All life within this Universe is connected through a field of energy that exists; we are directly connected to our Source

We must understand that as civilization redeveloped on Earth after the last great Cataclysm, a distortion in the understanding of the laws of the Universe occurred.

As humans regressed into a lower state of consciousness, or a contracted state of consciousness, this resulted in the rampant fear, anxiety, an illusion of separateness, and created a level of chaotic energy on Earth that prevented Humans from understanding their inherent divinity and connection with the Universe.

The goal of our Earth school at this time is to return to a state of loving awareness and connection with all of life. We are meant to see through the distortion that has occurred and find our way back to a connected, empowered, and higher state of consciousness.

The Laws of the Universe

We are meant to experience oneness, timelessness, and the loving abundance that the Universe is programmed to provide. We are meant to experience magic and miracles. We are meant to live in harmony and peace and to create beauty through our ideas and actions. However, we must learn to control our emotions and see through the distortion that has occurred to experience these things.

And we can move out of the state of lack, fear, anxiety and distrust that has plagued the human race for thousands of years.

“Keep thy heart or imagination with all diligence, for out it are the issues of life” Prov 4.23

This means that consciousness and the way we direct our consciousness creates the issues or physical manifestation of circumstances in our lives.

The bible is a book that explains the science of the mind. It is a book showing us how to release our soul or subconscious mind from the bondage we have inflicted upon ourselves.

The Laws of the Universe

Terms Used

Source = God, the Creator of our Universe

Source Energy = the energy from which we came, that we still have access to
Soul = an individual spark of energy from Source; also known as our own individual consciousness

Consciousness = the intelligence that pervades the Universe and is found in all energy that exists

Universal Mind = the mind of the Universe; the field of energy that connects us all; this field is alive and intelligent and connects us to our higher self and other dimensions within our Universe; also referred to as the Cosmic Computer or Quantum Field

Cosmic Computer = the mind of the Universe; the field of energy that connects us all; this field is alive and intelligent and connects us to our higher self and other dimensions within our Universe; also referred to as the Universal mind, or Quantum field

Quantum Field = the field of energy that connects us all; this field is alive and intelligent and connects us to our higher self and other dimensions within our Universe

Possible Future = there are more than one! Technically speaking, there are an infinite amount of possibilities. So while you have a probable future or a few probable futures, there are SO MANY POSSIBLE futures available to us.

Probable Future = the future (or handful of future timelines) we are currently tracking towards. This is the most probable outcome based on how you are currently taking action and living your life.

Fate = the probably future created by misguided actions, choices and life circumstances we were born into

The Laws of the Universe

Terms Used

Destiny = the highest possible future of fulfillment and happiness that is available to us

Energy Body = our energy field, which is an extension of our over soul; also known as our own individual consciousness or soul

Dimension = a particular vibratory state in our Universe where different beings or levels of consciousness reside

Rig Veda = an ancient collection of Sanskrit hymns that contain vast knowledge and wisdom, similar to the Christian Bible

Spiritual Law = one of the organizing principles of creation in our Universe (which are somewhat understood and explained by Quantum Physics Theory)

The Laws of the Universe

Law of Infinite Possibilities

In our Universe there are infinite possibilities.

The source of all creation is consciousness, and consciousness gives rise to infinite possibilities, where there is pure potential for **ANYTHING** to manifest.

In our world we have been taught about impossibility, lack and limitation. We have not been taught about unlimited possibilities, and our ability to manifest anything our mind can conceive.

We are meant to be creators, rather than victims of one creator-God's whims.

WE are the creators, giving rise to reality, situations, events and circumstances, based on how our mind operates. We are in the driver's seat, able to CREATE as a God.

Your true self, your soul, your spirit has the power to co-create with the Universe. By taking action and making choices, we begin to influence the potential that exists. And by tapping into the Quantum Field through meditation and journeying, we can have an even greater influence on the potential that exists.

However, if we are in a state of doubt, fear, anxiety, or being controlled by our Ego, we cannot tap into the field of infinite possibility and create our highest destiny. It is necessary to practice detachment from ego, healing from limiting beliefs, and finding peace in stillness and meditation to tap into the field and become a powerful co-creator with the Universe.

When we find our own internal power, or source of wisdom, and connect with our eternal essence, we are able to connect to the infinite positive possibilities that exist for our creation.

When we find connection with our eternal self, and are able to quiet the ego and remove our limiting beliefs, we are able to build a kind of internal power that magnetizes us for our desires and dreams.

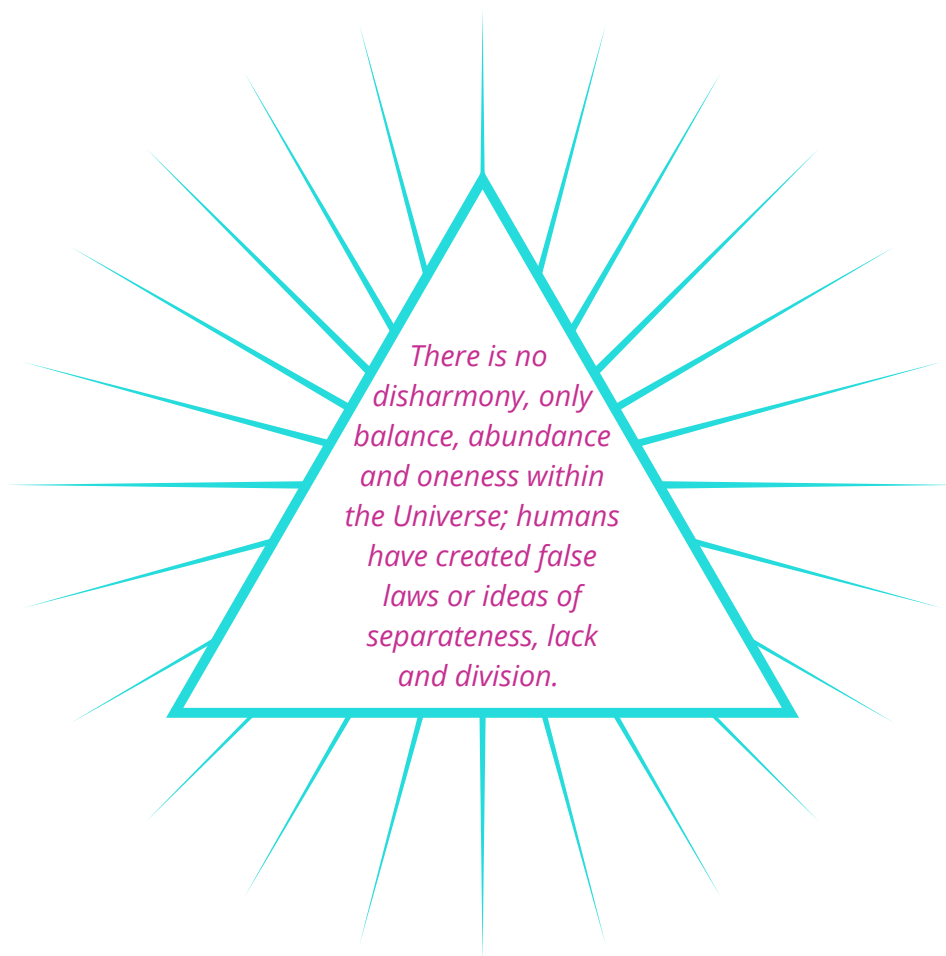

The Laws of the Universe

Law of Infinite Possibilities

By practicing awareness and conscious interaction with all of the other laws of the Universe, and by learning the self, connecting with the self and experiencing oneness through meditation, the Universe will begin working FOR you.

As we find this connection with ourselves and the Universe, we experience all of the laws of nature in full force, working to bring unlimited positive possibilities to pass.

The Laws of the Universe

The Law of One

The Universe is one living entity or being.

The Law of One is a law of Unity.

All life in our physical Universe is connected and stemmed from the SAME Source.

Life emanates from this Source, and returns to this Source through a process known as
Ascension

Quantum Physics is beginning to explain how particles can influence each other at a distance, proving this law in effect. Our particles (or energy) are all connected, and depending on bond that is formed between the particles, different levels of influence can be felt or experienced.

How you think and act, affects the collective on Earth and even affects all other life with which we are connected.

STAR FAMILY WISDOM

The Laws of the Universe

The Law of One

There is no end to your existence. This physical existence is only one aspect or experience within that totality of existence.

Love is the original force of creation and love is what is experienced when we are able to touch the realms beyond death.

The mind-body-spirit complex is what we can use to understand the Law of One or Unity.

When we align the mind, body and spirit, we are able to experience the Law of One within ourselves and can experience the oneness of creation. We can experience the intelligence of our higher consciousness or higher self when we access the realms beyond death, or access the Quantum Field.

When the Law of One is experienced and understood, healing and transcendent experiences can occur. This has been proven through many hypnotic regression cases in which a client has accessed a past life memory; once the Karmic connection between the past life and current life was identified by the human mind, instantaneous healing has occurred.

We can experience the Law of One through meditation and journeying. Meditating allows us to quiet the logical mind and experience the gap between thought that connects us to the Quantum field, or Universal Mind. Begin by attempting to quiet the mind; work up to full meditation by celebrating small moments of stillness and training the brain to let go of thoughts.

The Laws of the Universe

The Law of Giving and Generosity

This law is about seeing and acknowledging the law of one by acting in service to others. Knowing that the Universe is an extension of ourselves, and that other living beings are an extension of ourselves, and knowing that we are all intimately connected, stemming from the same source, it becomes easy to see the beauty in being generous.

Generosity and giving can manifest in many different ways. We can be generous with our thoughts, with our love, with our intentions, with our actions, and with our time.

When we are able to see past our own immediate circumstances, challenges and experiences, we can begin to see the beauty in the totality of this life experience and we can find contentment and fulfillment in being of service to others. We must see the greater whole, and understand that everything we do, think and feel will affect the collective.

And when we know that how we act, how we think and how we feel will result in the Universe reflecting those actions, ideas and feelings back to us in our experiences, it becomes even easier to begin the practice of giving and generosity.

And ultimately, it's just the right thing to do. If we can contribute to the evolution of life in a positive way, why not choose that path.

The Laws of the Universe

The Law of Karma

This is the law of cause and effect and the law of consequences.

This is similar to Newton's laws of physics that say that every action has an equal and opposite reaction, meaning every action we take will have consequences. Some of those consequences will be felt in your current life depending on the level of Karma created.

Because the soul is incarnating in a physical experience for the purpose of learning, growing, evolving and acquiring wisdom, some Karmic situations must be resolved in different lifetimes if the Karma was not "paid" in the current lifetime. Some "small" Karmic events will usually be resolved in the current lifetime while others may need to be resolved in the subsequent life.

Examples of "small" Karmic events:

- Stealing, which might result in you experiencing lack or loss of personal property
- Expressing gratitude and love towards others, which might result in your receiving more love from strangers

Examples of "big" Karmic events:

- Relationship issues, which might result in you returning to Earth to repair that relationship or try again
- Causing extreme trauma for another being, which might result in you needing to experience a traumatic event in a future life

By cultivating awareness and making conscious choices aligned with our values, we can create positive outcomes and break free from negative patterns. This law teaches us the importance of taking responsibility for our actions and the power we have to shape our destiny.

This law reminds us that we are responsible for our choices and that our actions create a ripple effect in our lives and the lives of others.

The Laws of the Universe

The Law of Karma

This is the law of cause and effect and the law of consequences.

This is similar to Newton's laws of physics that say that every action has an equal and opposite reaction, meaning every action we take will have consequences. Some of those consequences will be felt in your current life depending on the level of Karma created.

Because the soul is incarnating in a physical experience for the purpose of learning, growing, evolving and acquiring wisdom, some Karmic situations must be resolved in different lifetimes if the Karma was not "paid" in the current lifetime. Some "small" Karmic events will usually be resolved in the current lifetime while others may need to be resolved in the subsequent life.

Examples of "small" Karmic events:

- Stealing, which might result in you experiencing lack or loss of personal property
- Expressing gratitude and love towards others, which might result in your receiving more love from strangers

Examples of "big" Karmic events:

- Relationship issues, which might result in you returning to Earth to repair that relationship or try again

By cultivating awareness and making conscious choices aligned with our values, we can create positive outcomes and break free from negative patterns. This law teaches us the importance of taking responsibility for our actions and the power we have to shape our destiny.

This law reminds us that we are responsible for our choices and that our actions create a ripple effect in our lives and the lives of others.

The Laws of the Universe

The Law of Karma

We must remember that we are operating in a field of infinite possibilities and with every action we take, we are creating a timeline for our life or a probability for how our life will play out. Once we take certain actions, we have created a momentum of energy that is drawing us toward a future that becomes more and more probable with each choice we make.

A timeline is like a thin cord of light reaching from the present into the past and future as we perceive it.

All events and possible events that could exist in our Universe are recorded and are accessible via the quantum field.

We sometimes refer to this a momentum tunnel - this is the trajectory of your life path, based on the actions that have transpired to date. It can also be seen as "fate"; our "fate" becomes prescribed to us based on that momentum that has been created by our life circumstances, beliefs we hold, actions we take, etc. It is our mission to achieve our learning and growth, while connecting to and fulfilling our destiny, rather than getting stuck in the grips of fate and negative Karma.

Some of our choices are made consciously, and some are made unconsciously.

The best way to avoid unnecessary Karma is by making conscious and mindful choices.

However, the human mind is like a computer that can get easily programmed. When our subconscious mind has been programmed into limited thinking, limited beliefs, negative thought patterns and when we are stuck in the fight or flight state (stress mode), we are unable to make conscious, positive choices.

We must reprogram the subconscious mind and remove old limiting, negative beliefs and find a place of peace and balance from which we can make mindful, conscious choices.

To avoid getting stuck in the wheel of Karma, look for ways you can find the lesson in all experiences. How can the experience benefit you and others? How can you evolve and make different choices next time? If you have made a negative unconscious choice that resulted in a negative experience for another, how can you pay that Karma by creating a positive experience?

The Laws of the Universe

The Law of Karma

Some of our choices are made consciously, and some are made unconsciously.

The best way to avoid unnecessary Karma is by making conscious and mindful choices.

However, the human mind is like a computer that can get easily programmed. When our subconscious mind has been programmed into limited thinking, limited beliefs, negative thought patterns and when we are stuck in the fight or flight state (stress mode), we are unable to make conscious, positive choices.

We must reprogram the subconscious mind and remove old limiting, negative beliefs and find a place of peace and balance from which we can make mindful, conscious choices.

To avoid getting stuck in the wheel of Karma, look for ways you can find the lesson in all experiences.

How can the experience benefit you and others?

How can you evolve and make different choices next time?

If you have a made a negative unconscious choice that resulted in a negative experience for another, how can you pay that Karma by creating a positive experience?

The Laws of the Universe

The Law of Karma

Not all Karma is bad! The goal is to be focused on conscious action and choices that are bettering ourselves and others, while serving our ultimate purpose and destiny in this life.

Questions to ask yourself:

Are my choices benefiting the collective?

Are my choices in right relationship with the Universe and all of life?

Are my choices and actions helping or creating a positive influence in the lives of others?

Am I operating from a heart centered place?

Am I connected with the guidance of my heart?

Forming a connection between our brain and heart, creating a synchronistic energetic connection, can help us tap into our own intuitive guidance. We've learned that the heart operates independently from the brain and has its own connection with the field or Universal Mind, from which we can access our own higher self and the wisdom we have attained throughout our existence.

Because our minds can be limited by rational, logical thought, we must form a connection with our heart to FEEL and KNOW the right action or choice.

The Laws of the Universe

Jesus Taught About Transcending the Law of Karma

Jesus Christ, a revered spiritual master, is known for his profound teachings on love, compassion, and forgiveness. While his teachings are widely recognized, there is a lesser-known aspect of his message that pertains to transcending the law of karma. In this article, we will explore how Jesus' teachings offer insights into rising above the cycle of cause and effect and embracing a higher spiritual path.

Jesus' Teachings on Transcending Karma: Jesus' teachings went beyond the conventional understanding of karma. He emphasized the transformative power of love, forgiveness, and spiritual awakening as means to transcend the karmic cycle. Here are some key aspects of his teachings:

1. Love and Compassion: Jesus taught that love and compassion are transformative forces that can break the chains of karmic patterns. By cultivating unconditional love and extending compassion to all beings, we can dissolve negative karmic imprints and create a positive ripple effect in the world.

2. Forgiveness and Redemption: Jesus emphasized the importance of forgiveness as a means to release ourselves from the karmic burden of resentment and anger. He taught that through forgiveness, we can experience spiritual liberation and open ourselves to divine grace and redemption.

3. Spiritual Awakening: Jesus' teachings centered around the concept of spiritual awakening, which involves transcending the limited egoic self and realizing our divine nature. By awakening to our true essence, we can align ourselves with higher spiritual principles and transcend the limitations imposed by karmic patterns.

4. Divine Grace: Jesus spoke of the transformative power of divine grace, which can transcend the effects of karma. He taught that through surrendering to the divine and opening ourselves to grace, we can experience liberation from the karmic cycle and attain spiritual enlightenment.

The Laws of the Universe

The Law of Grace and Forgiveness

The Universe bestows grace to those who are kind of heart and of pure intention, or to those who are truly ready to forgive others or themselves.

We must be acting in right relationship with all of life, not acting as a predator or parasite, acting with reverence and love for all. When we do, the Universe acknowledges our benevolence and will bestow grace upon us and others when it is needed.

We can call upon the Law of Forgiveness to restore balance to ourselves and our Karma. We can show that we see clearly and are asking for forgiveness for any unconscious or negative actions we have taken.

When we can understand, acknowledge and sit with the traumas of this world, we can find it easier to forgive those who have been acting from their subconscious programs and traumas.

We can also find the greatest peace and contentment when we let go of anger, resentment or anxiety and forgive another for their actions, knowing that they were only acting from an unconscious state.

**FORGIVE
YOURSELF**

When we find the lesson or wisdom in the circumstance that was created, we can find freedom from the grips of Karma and will experience the grace of generosity, love and compassion.

The Laws of the Universe

The Law of Gratitude

This spiritual principle teaches us the profound impact that expressing gratitude can have on our lives, allowing us to unlock abundance, joy, and a deeper connection with the divine. Gratitude is more than just saying "thank you" for the blessings we receive. It is a state of being, a mindset that acknowledges and appreciates the abundance that surrounds us.

When we cultivate an attitude of gratitude, we shift our focus from what is lacking to what is present, opening ourselves up to receive even more blessings. The Law of Gratitude operates on the principle of energy and vibration. Like attracts like, and when we emit a frequency of gratitude, we attract more things to be grateful for. It is a powerful magnet that draws positive experiences, people, and opportunities into our lives.

By expressing gratitude, we align ourselves with the flow of abundance and create a positive ripple effect in our reality. Practicing gratitude is not limited to moments of success or happiness. It is about finding gratitude in every aspect of our lives, even during challenging times. When we can find something to be grateful for, even in the midst of difficulties, we shift our perspective and invite transformation.

Gratitude helps us to see the lessons and growth opportunities that arise from adversity, allowing us to navigate life's challenges with grace and resilience. Moreover, the Law of Gratitude deepens our connection with the divine.

When we express gratitude, we acknowledge the presence of a higher power and recognize the interconnectedness of all things. It is a way of honoring the blessings bestowed upon us and showing appreciation for the divine guidance and support we receive. Incorporating gratitude into our daily lives can be done through simple practices.

Beyond Grateful!

The Laws of the Universe

The Law of Gratitude

Keeping a gratitude journal, where we write down things we are grateful for each day, helps to cultivate a mindset of appreciation. Taking a few moments each morning or evening to reflect on the blessings in our lives can also be a powerful practice.

Additionally, expressing gratitude to others, whether through words or acts of kindness, not only uplifts their spirits but also amplifies the positive energy within us. As we embrace the Law of Gratitude, we begin to experience a profound shift in our lives. We become more attuned to the abundance that surrounds us, and our perspective transforms from one of lack to one of abundance. We attract more opportunities, relationships, and experiences that align with our highest good. Our hearts overflow with joy, and we radiate a positive energy that uplifts those around us.

The Laws of the Universe

The Law of Non-Resistance

Allow yourself to go with the flow no matter the circumstance, **KNOWING that your divine destiny is unfolding as intended.**

Once you have a working knowledge of the law of the Universe and start to see the effects of these laws in your life, you will begin to hold more FAITH in the laws.

FAITH or strong belief is required for us to practice non-resistance. We often resist circumstances or resist the idea of holding faith, which demagnetizes us for the positive possibilities and infinite abundance of the Universe.

From a biological standpoint, we must also be in a **RECEPTIVE state**, or a state of restoration and regeneration to be able to commune with nature and the Universe in a way that brings us the positive experiences we desire. When we are resistant to situations or life in general, are stressed and anxious or are in heightened emotional states, we will not be able to connect to the field to manifest our desires our intentions.

Holding limiting beliefs, fears, or doubts about your worthiness in this world is an automatic recipe for living in Fight or Flight Mode, which puts us in a state of resistance, rather than a state of receptivity.

The Laws of the Universe

The Law of Non-Resistance

Fight or Flight Mode = Stress Mode

- Stress mobilizes our sympathetic nervous system which keeps us in a heightened state of alertness, or activates the response to danger
- When you are in fight or flight mode, you aren't able to learn, create, or communicate well and you are focusing all of your body's energy on survival
- When we are stressed we shut down the creative mind or access to your higher self or access to the quantum field where you can retrieve ideas and inspiration (or manifest your desires)
- We are naturally wired to respond to stress and threats, but we are not meant to be in a state of stress or fear constantly

Non-resistance is an art and when acquired the world is yours!

Science is also now proving that our emotions and thoughts have a direct impact on the genetic expression of our DNA.

Negative Thoughts and Emotions = negative gene expression and disease (**if you are in a state of stress, fear and anxiety, you are automatically generating a negative state that your body and the Universe are beginning to respond to)

Positive Thoughts and Emotions = positive gene expression and health

So not only does our mind connect to our higher mind and Universal mind to create the physical reality around us, it ALSO impacts the physical expression of reality in our bodies, leading to a state of health or a state of dis-ease.

Establish the ideas of security, health, happiness, and abundance in the subconscious and life will be free from all limitation!

The Laws of the Universe

The Law of Non-Resistance

The Ancient Egyptians were masters of understanding the science of the mind, the science of manifestation and the science of connecting with the Quantum Field. Jesus Christ even studied with the Egyptians to learn how to become a masterful co-creator with the Universe.

Hermes Trismegistus in Egypt taught that all mental states are accompanied by states of vibration; you combine with what you vibrate to

The Laws of the Universe

The Law of Desire and Attachment

Humankind has unlearned the ways of Spirit and unlearned the Laws of the Universe over the last 5000 years as the rise of Patriarchy occurred.

We have been taught that we are separate and that we should believe in scarcity and lack. We have allowed these ideas and beliefs to become so ingrained in our human consciousness that the idea of endless abundance and good fortune seems inappropriate or imbalanced. It is easy to look at the world and feel sadness for the great lack of abundance and love that has flourished, but this has only occurred by misdirection of our consciousness.

These are NOT the actual laws of existence and we must not allow these false laws to perpetuate any further.

The great masters like Pharoah Akhenaten and Jesus, who have incarnated as humans many times over the last 10,000 have attempted to shift the consciousness of humans from a state of lack to a state of love and abundance.

In fact, many of the great metaphorical teachings in the Bible, or Rig Veda speak about the use of consciousness to create, and speak about the endless abundance that is available to us if we are acting in right relationship with all of life. We are able to attract to us what we need, when we need it.

Humans have chosen to believe in and live in a limited reality. Limitation and lack are not our natural states of being!

The Laws of the Universe

The Law of Desire and Attachment

You can think of the Universe as an extension of your energy body. How we manage our energy body and our consciousness will have a direct influence on how the Universe produces our reality.

Energetically, when we make changes in our state of consciousness, we are creating changes in the flow of energy in the Universe, because it is all connected.

The Universe is an extension of us. We are an extension of the Universe.

As above, so below. As within, so without.

Our emotional state and energetic signature or vibration is what we use to communicate with the mind of the Universe. All emotional states are vibrations; you need to become a vibrational match with the reality you want!

You are continually manifesting all day every day based on your state of consciousness. And your words carry vibration. Choose them carefully.

Anger, resentment, ill-will, jealousy and revenge will only come back to you and may bring sickness, failure and poverty

The Laws of the Universe

The Law of Detachment

Practicing non-attachment and "wanting" nothing will make you more magnetic.

We can often find ourselves in a place of attachment to material things. In fact, our society has valued the material world over the Spiritual world, or has taught us to seek external validation instead of finding contentment within ourselves. This has led to a society where many people associate their self worth with material things which makes us less magnetic and creates too strong of a desire for the material.

When we can find peace in our hearts, practice stillness and find comfort with who we are at our core, we can find our attachment to "things" dissipate. We most often attach ourselves to things or people when we are not content, or at peace with ourselves, seeking external validation.

When we have detached from the need for any sort of external validation, we create a state of receptivity that allows the Universe to start working WITH us. We must become an "empty vessel" for Spirit to flow through and we cannot do that if we have emotions of strong desire and attachment.

Jealousy is the worst enemy of love. Love is the most pure emotion in the Universe and as we find loving connection with all of life around us, the love, abundance and prosperity that is yours by divine right will come to you.

The Laws of the Universe

The Law of Detachment

While setting intentions and having a desire for something to enter your life is a healthy practice, we can easily move into a state of forming attachment to those desires or intentions. Attachment creates more desire and too strong of a desire can create even more attachment, so we must be mindful of our desires and practice non-attachment at all times.

When we find ourselves too attached to a certain thing or person, we can find the emotions of jealousy or resentment occur; these emotions will only bring unhappy situations for us so when we find ourselves too attached or experiencing these emotions, we must look in the mirror and ask what these emotions are trying to teach us about ourselves.

Going inward and facing our shadow can be hard work, but once we have fully met all parts of ourselves and begun the process of healing old wounds that led to negative thought patterns and emotions, we can begin to find the peace and state of receptivity that will allow us to be in flow with all of life.

Any disharmony in your environment is a symptom of disharmonious consciousness or thinking.

The Universe is holographic and will mirror back to you your own internal state. As we find love, peace and gratitude in our hearts, we will experience a more beautiful outer world.

The Laws of the Universe

The Law of Divine Purpose

We are all born into this world with a purpose, or a divine plan for our lives. While we live in a world of free will and can actively make choices that determine a particular momentum for our future (or fate), we came into this world with a plan and with gifts to offer the human race.

Because of the density of our dimension, we often forget that purpose or plan once we are incarnated in human form, and must work to remember or reconnect to that purpose at some point in our lives.

When we incarnate in the lower dimensions (Earth vibrates between the 3rd and 4th dimensions) we cross over a “veil” that separates the lower dimensions from the higher dimensions, creating an experience of forgetting all of creation that is beyond the veil. The “veil” that separates the lower dimensions from the higher dimensions has prevented humanity from truly understanding our place within this expansive reality, allowing us to create the false laws of separateness, and lack.

As we expand our consciousness to understand more about our human history, our spirituality and this expansive reality, we will activate memories from our previous lives and will access a higher state of consciousness that allows us to more easily embody our purpose and be guided by the forces of Spirit.

Cultivating a Spiritual practice, a meditation routine and healing from any traumas we have experienced can help open our connection to our higher self and the less dense dimensions, which allows us to receive our own internal guidance or guidance from ancestors, teachers and guides.

The Laws of the Universe

The Law of Divine Purpose

Because of the vast amount of positive change that is needed on Planet Earth, we must look within ourselves to find our passions, hopes and dreams, and channel those into being of service, ultimately fulfilling our divine purpose or mission.

When we are acting in service to the greater good, and using our talents and gifts to support the harmony and balance among all living things, we are acting in right relationship with the Universe and the Earth.

The Universe responds to pure loving intent and fulfillment of purpose. Once we are "on purpose" and acting from a place of gratitude, humility, integrity and honesty, the Universe will begin working in favor.

Because we live in a collective, we will continue to experience some of the consequences of the collective's choices, but we can begin to live outside of the collective reality, in perfect alignment with Spirit.

And once we are in perfect alignment with Spirit, and are fulfilling a purpose that is greater than ourselves, we can begin to shift the consciousness of the collective as well, ultimately resulting in a positive evolution for the human race.

You are a Spiritual being having a human experience!

To fully practice these laws and step into our purpose we must let go of suffering and transcend the programming that has been passed down to us from the human race.

We often get taught that suffering is holy. Yes and No.

Learning and growing from our suffering is holy.

Continued suffering is unnecessary.

All God, Source, the Universe cares about is that we are learning, growing and evolving, and bringing more love into physical existence.

The Laws of the Universe

The Law of Divine Protection

The Universe has created protection mechanisms for those who follow the Spiritual laws of the Universe. Those protection mechanisms include:

- Guidance and protection from disembodied teachers, guides, angels and ancestors; you've probably heard the stories of guardian angels rescuing a human from danger, or a person experiencing an NDE only to commune with their angels and then return to Earth
- Psychic premonitions and visions, giving you insight into what is to come
- Miracles or shifts in situations in your life that steer you out of danger or into a different circumstance
- Food, shelter, or money appearing in a time of need

We must move into a state of "Miracle Consciousness" for when we fully trust in the laws of the Universe, prepare for miracles, and expect miracles we are beginning to call upon the creative principles of the Universe that will work in our favor.

Ask for guidance, and develop a relationship with the Universe, your guides and teachers; they're there to support you but have difficulty communicating when we don't believe or when we have closed our channel to other dimensions.

We often receive guidance via intuitive hunches or signs, and are sometimes quick to dismiss this information; trust your gut!

The Laws of the Universe

The Law of Divine Protection

The Universe has created protection mechanisms for those who follow the Spiritual laws of the Universe. Those protection mechanisms include:

- Guidance and protection from disembodied teachers, guides, angels and ancestors; you've probably heard the stories of guardian angels rescuing a human from danger, or a person experiencing an NDE only to commune with their angels and then return to Earth
- Psychic premonitions and visions, giving you insight into what is to come
- Miracles or shifts in situations in your life that steer you out of danger or into a different circumstance
- Food, shelter, or money appearing in a time of need

We must move into a state of "Miracle Consciousness" for when we fully trust in the laws of the Universe, prepare for miracles, and expect miracles we are beginning to call upon the creative principles of the Universe that will work in our favor.

Ask for guidance, and develop a relationship with the Universe, your guides and teachers; they're there to support you but have difficulty communicating when we don't believe or when we have closed our channel to other dimensions.

We often receive guidance via intuitive hunches or signs, and are sometimes quick to dismiss this information; trust your gut!

The Laws of the Universe

The Law of Vibration

At its core, the Law of Vibration states that everything in the universe is in a constant state of motion and emits its own unique frequency. This means that every object, thought, and emotion carries a specific energetic vibration. These vibrations interact and influence one another, creating a complex web of interconnectedness.

Think of it this way: just like musical notes combine to form a beautiful melody, the vibrations of different objects and energies blend together to create the symphony of life. This concept is not limited to the physical realm but extends to our thoughts, emotions, and even our spiritual essence. The Law of Vibration suggests that our thoughts and emotions have a direct impact on our reality. When we emit positive vibrations through thoughts of love, gratitude, and abundance, we attract similar frequencies into our lives.

Conversely, negative thoughts and emotions can attract experiences that align with those lower vibrations. Understanding the Law of Vibration empowers us to take control of our lives and consciously shape our reality. By becoming aware of our thoughts and emotions, we can intentionally raise our vibrational frequency and attract more positive experiences. This involves cultivating a mindset of positivity, practicing gratitude, and engaging in activities that bring us joy and fulfillment. Moreover, the Law of Vibration highlights the importance of surrounding ourselves with positive influences.

Just as tuning forks resonate with one another when they share the same frequency, we are more likely to attract people and situations that align with our energetic vibration. By consciously choosing to be in the company of uplifting individuals and engaging in activities that nourish our soul, we can enhance our vibrational frequency and create a harmonious environment. Ancient wisdom traditions and modern scientific discoveries both support the principles of the Law of Vibration.

Quantum physics, for instance, reveals that everything in the universe is composed of energy and that this energy is in a constant state of motion. The Law of Vibration provides a framework for understanding the energetic nature of reality and how our thoughts and emotions can influence the outcomes we experience. By raising our own vibrational frequency through practices such as meditation, gratitude, and self-care, we can align ourselves with higher states of consciousness and attract more positive experiences into our lives. This law teaches us the power of energetic resonance and the impact it has on our well-being.

The Laws of the Universe

The Law of Divine Timing

In a world that often feels fast-paced and demanding, it can be challenging to surrender control and trust in the timing of life's events. However, the Law of Divine Timing teaches us that everything happens in its own perfect time and that the universe has a grand plan for each of us. In this article, we will explore the concept of the Law of Divine Timing and how it can bring peace and serenity to our lives.

The Law of Divine Timing suggests that there is a higher intelligence at work, orchestrating the events and circumstances of our lives. It reminds us that there is a divine order to everything, even when it may not be apparent to us in the present moment. This law invites us to release our need for immediate results and instead trust that everything is unfolding exactly as it should. Often, we find ourselves impatiently pushing for outcomes or feeling frustrated when things don't go according to our plans.

However, the Law of Divine Timing reminds us that there is a greater wisdom at play. It encourages us to surrender to the flow of life and have faith that the universe knows what is best for us. When we align ourselves with the Law of Divine Timing, we open ourselves up to a world of possibilities. We learn to let go of the need to control every aspect of our lives and instead embrace the present moment. This allows us to be fully present and engaged in our experiences, trusting that the universe will guide us towards our highest good.

The Laws of the Universe

The Law of Divine Timing

Divine timing often reveals itself through synchronicities, unexpected opportunities, and serendipitous encounters. It is those moments when everything seems to fall into place effortlessly, and we realize that there is a greater force at work. These moments serve as reminders that the universe is always conspiring in our favor, even if we can't see it at the time.

Trusting in the Law of Divine Timing requires patience and a deep sense of faith. It asks us to release our attachment to specific outcomes and instead focus on aligning our energy with our desires. By cultivating a sense of trust and surrender, we allow the universe to work its magic and bring forth the perfect timing for our dreams to manifest.

It's important to remember that divine timing does not mean sitting back and doing nothing. It is about taking inspired action and following our intuition while remaining open to the signs and guidance that the universe provides. It is a delicate dance between effort and surrender, where we actively participate in co-creating our reality while trusting in the divine plan.

The Laws of the Universe

The Law of Divine Love

Love is a universal language that transcends boundaries and connects us all. It is a force that has the power to heal, transform, and uplift. Within the realm of spirituality, love takes on a deeper meaning and significance. It becomes the essence of our connection to the divine, the source of all creation.

The Spiritual Law of Divine Love teaches us about the power of unconditional love. It is a law that reminds us that love is not limited to romantic relationships or familial bonds, but extends to every aspect of our lives. It is a love that goes beyond conditions, expectations, and judgments.

At its core, the law of divine love teaches us to love ourselves unconditionally. It encourages us to embrace our flaws, accept our imperfections, and recognize our inherent worthiness. When we love ourselves deeply and authentically, we are able to extend that love to others.

Divine love also teaches us to love others without conditions or expectations. It is a love that sees the inherent goodness in every being, regardless of their actions or beliefs. It is a love that seeks to understand, support, and uplift others on their own unique journeys.

Practicing the law of divine love requires us to cultivate compassion, forgiveness, and empathy. It asks us to let go of resentments, grudges, and judgments, and instead choose love as our guiding principle. It is a continuous practice of choosing love over fear, kindness over anger, and understanding over judgment.

When we align ourselves with the law of divine love, we open ourselves up to experiencing profound healing and transformation. We become vessels of love, radiating its energy and touching the lives of those around us. We create a ripple effect of love that has the power to uplift humanity and bring about positive change.

In our journey of embracing the law of divine love, it is important to remember that love starts from within. It begins with self-care, self-acceptance, and self-compassion. As we cultivate a deep and unconditional love for ourselves, we are able to extend that love to others and create a more loving and harmonious world.

The Laws of the Universe

Working with Spiritual Law

When we are working with Spiritual law, we are working to bring into existence that which already is. For remember, there are INFINITE, ENDLESS possibilities, so we are selecting that possibility which already exists and directing it into physical form.

Even in situations of danger that may have been brought about by our doubts, anxieties or fears, **there is always a way out, always an opportunity to call upon Spiritual Law to support us.**

Humans have mistakenly put their power outside of themselves, while in fact, our power comes from full belief, trust and faith in the laws of the Universe and the creative principle that exists inside of ourselves. We must realize that the principle of creation is actually programmed into us as one of the ultimate law of the Universe, **allowing us to co-create with the Universe using heart centered intent and action.**

"The Lord is my Sheperd. I shall not want." Psalms 23:1

This means that divine intelligence is acting to supply our every need, IF we are following all of the laws, connecting with oneness, acting in service to all, pushing aside our ego and personal desires for the greater good, and trusting in the flow of abundance that is inherent in this divine reality.

Living with the Spiritual Laws is a beautiful dance with the Universe that can lead to overwhelming joy and abundance.
