

# WIRED TO LEAD: THE DEEPER™ FOR HR LEARNING LAB

## From Hype to Fluency Building HR Confidence with AI

Today, most companies have goals around ethical AI, inclusive decision-making, and leadership development. This learning lab aligns with those goals while increasing fluency in AI without being too jargon-y.

### WHAT THIS IS

This isn't **just** tech training. It's a 90-minute learning lab designed to help HR leaders reflect on their role in the age of AI, recognize bias triggers, increase their fluency in AI, and confidently lead conversations around people, data, and AI.

We use the proprietary DEEPER™ Framework and Insight Compass™ archetypes to equip you with clear language, stronger awareness, and better decision-making tools, all grounded in real-world HR scenarios.

### YOU'LL LEAVE WITH

- A clearer understanding of how AI actually works, explained without jargon
- Tools to recognize and interrupt bias under pressure
- Your Insights Leadership Archetype and how it shapes decision-making
- A structured DEEPER™ decision loop
- Real examples of AI prompts for hiring, feedback, engagement, and policy

### WHY IT MATTERS (FOR YOU & YOUR ORG)

#### For You

Build your HR data-driven leadership fluency in AI conversations.

Gain tools to recognize and interrupt bias under pressure.

Become a more reflective, values-aligned leader in the AI space.

#### For Your Company

Reduce risk around unconscious bias, hiring, and AI misuse.

Empower HR as a strategic advisor in the AI transition.

Foster ethical, confident decision-making across people teams.

### PRICING & ENROLLMENT

- 90-minute virtual session, includes (pdf & fillable pdf)
- General session only \$247
- Private group sessions available upon request

### COMMON USE CASES

- CHROs, HR Leaders, & People Ops looking to:
- Evaluate new AI tools
  - Support teams through change
  - Lead with clarity in complexity
